Summary

Results-driven and detail-oriented software developer currently pursuing M.Tech in Computer Science. Holds a B.Tech in Computer Science and also gained practical industry exposure as a Freelance Java Developer. Additionally completed professional Java Full Stack Development training during the same period. Experienced in developing Java and Spring Boot applications, database management, and web technologies with strong analytical and problem-solving skills.

Education

M.Tech in Computer Science & Engineering, *SRM Institute of Science and Technology* 08/2025 – Present
CGPA-8.51

B.Tech in Computer Science & Engineering, *SRM Institute of Science and Technology* 07/2019 – 05/2023
CGPA-8.68

Senior Secondary Education, *Tulsi Ram Maheshwari Public School* 04/2018 – 04/2019
Percentage-65%

Secondary Education, *Tulsi Ram Maheshwari Public School* 04/2016 – 04/2017
CGPA-7.2

Technical Skills

Languages — Java, SQL, HTML, CSS, JavaScript

Frameworks & Technologies — Spring Boot, Spring MVC, JDBC, Hibernate/JPA, RESTful API Development, Maven, JSON, (Servlet and JSP) Basics

Developer Tools — IntelliJ IDEA, Eclipse, Visual Studio Code, STS, Postman

Databases & Systems — MySQL, Database Management Systems (DBMS)

Projects

OD Management System | React.js, Spring Boot, MySQL, REST APIs

- Developed a full-stack web application to manage student On-Duty (OD) records with separate Admin and Faculty roles.
- Implemented Excel-based bulk data upload to import student attendance records into a PostgreSQL database.
- Developed RESTful APIs using Spring Boot and Spring Data JPA for student record management and database operations.
- Implemented multi-criteria filtering by course, branch, year, section, event, date, and time to retrieve relevant OD records.
- Integrated pagination to display records efficiently and Excel export functionality to download filtered data.
- Deployed the React frontend on Vercel and the Spring Boot backend on Render for online accessibility.

Inventory & Order Management System 07/2023 – 06/2025

- Developed an Inventory & Order Management System using Java, Spring Boot, MySQL, and Hibernate/JPA to manage products, suppliers, and customer orders.
- Implemented secure JWT authentication and role-based authorization using Spring Security.
- Built 25+ REST APIs with CRUD operations, pagination, sorting, filtering, and validation.
- Optimized SQL queries and database indexing to improve API response time and application performance.

Courses

Java Full Stack Development, *Jspiders(Java Training and Development Center)* 01/2024 – 01/2025

Learned Core Java, SQL, Web Technologies, J2EE, and Spring Frameworks with hands-on experience in backend development, REST APIs and full-stack application development using Java and Spring Boot.
